Reotemp's Hi-Vis dial increases the visibility of dial gauges in low-light environments and at a distance. Hi-Vis dials are often used in areas where gauge readings are paramount to safety of the process. They can also be used to differentiate between two different process lines within a facility.

Hi-Vis™

**-HV** Hi-Vis™ High Visibility Dial

**Availability** PR, PT, PG-S and PC

## COLOR BANDS &amp; COLOR PIES

Color bands and pies highlight a specific range on the gauge so that it is immediately apparent if the process falls within a critical pressure range.

**-CB** Color Band (Specify Colors and Ranges)

**-CP** Color Pie (Specify Colors and Ranges)

**Availability** PR, PT, PG, PC and DP Gauges
